HME WIRELESS IQ 6000 ODYSSEY PROGRAMMING INSTRUCTIONS

Following are the programming instructions for your HME Wireless IQ 6000 headset and HME Wireless IQ 6000 base station.

- 1 Place battery in belt pack or all-in-one headset, do not turn the unit on during this step.
FOR BELT PACKS:
Make sure to plug a working headset into unit.
- 2 Open Base Station on the wall by depressing clips at the top.
- 3 Once open, locate the LED display to the left as well as three black buttons.
- 4 Press the black “start registration” button in the lower right hand corner.
- 5 You should see a “O” (half zero, just the bottom of the LED “8” will be lit) appear on the LED display.
- 6 Turn on belt pack / all-in-one headset while pressing “B” button, then release both buttons at the same time. You will hear registration mode communications thru the headset.
- 7 It will take only a few seconds and the red light on unit should turn green.
- 8 **If an “F” flashes on your base station, call 800-598-2370.**
“F” indicates that maximum units have been registered. History needs to be cleared.

IMPORTANT!
REPAIRED UNIT WILL NOT WORK
UNTIL YOU FOLLOW THESE INSTRUCTIONS.

HME 6000 ION PROGRAMMING INSTRUCTIONS

Following are the programming instructions for your HME Wireless IQ 6000 headset and HME ION 6100 base station.

- 1 Make sure the headset has a fully charged battery installed and the power is **OFF**.
- 2 Hit any button on the **BASE STATION** to light up the screen.
- 3 Select the **MENU** option (bottom left, black arrow).
- 4 Then select **REGISTER HEADSETS** option (top right, black arrow).
- 5 Then select **REGISTER HEADSETS** option (bottom right, black arrow).
- 6 Select **REGISTER SINGLE** (bottom left) or **REGISTER MULTIPLE** (bottom right, only if you have multiple headsets to register).
- 7 On your headset, hold down the “**B-BUTTON**” and the **RED POWER BUTTON** together.
- 8 Once you see the **RED** and **GREEN** lights on the headset, you are in registration mode and can release the buttons.
- 9 When the light on the headset turns green, that means it's registered. This may take up to a minute. The base station will revert to the home screen automatically.
