**RE-PROGRAMMING YOUR REPAIRED**

# EOS or Chrome
HME HEADSET

**1** Make sure the headset has a fully charged battery installed and the power is **OFF**.

**2** Hit any button on the **BASE STATION** to light up the screen.

**3** Select the **MENU** option (bottom left, black arrow).

**4** Then select **REGISTER HEADSETS** option (top right, black arrow).

**5** Then select **REGISTER HEADSETS** (bottom right, black arrow).

**6** Select **REGISTER SINGLE** (bottom left) or **REGISTER MULTIPLE** (bottom right, only if you have multiple headsets to register).

**7** On your headset, hold down the **"B-BUTTON"** and the **RED POWER BUTTON** together.

**8** Once you see the **RED** and **GREEN** lights on the headset, you are in registration mode and can release the buttons.

**9** When the light on the headset turns green that means it's registered. This may take up to a minute. The base station will revert to the home screen automatically.
